My name is **Casper Bodin Lindberg** and I love software development and UX design. I have been programming in several languages for close to **eight years** now, mainly in **C#** and for about two years I've been doing **Java (Android)** professionally. I also have experience in front-end & back-end (ASP) in **web development**, graphical design and some **C++**.

I love to face extensive challenges and finding unique solutions to problems, so If you need a dedicated developer who **loves the work**, then you found one!

I also love doing open source hobby projects. I have about **400 stars** scattered around my **GitHub projects**, and download count exceeding **250,000**. I've attended multiple hackathons, and the latest my team won was the Fintek Hackathon sponsored by **Societe Generale**.

Besides creating software that people find useful and helpful, my hobbies include spending time with loved ones, gaming

C# 90%
.NET 90%
Java (Android) 75%

Front end / UX / Design 70%
Web backend 70%
C++ 30%

Photoshop 90%
Sony Vegas 40%

After Effects 65%
Windows 95%

HACKATHON

Tapp Interactive winning the FinTech Hackathon sponsored by Societe Generale.

We made an android and iOS application plus a WCF server in C# for taking small and quick bank loans based on personal data of the user.

2017 - CURRENT

HOOKAPP

PROJECT MANAGER & DEVELOPER

Currently working as the project manager and developer for a dating application. Besides structuring and leading the team, I also work on UX and Android development.

Google play: goo.gl/pc1Cuy

2016 - 2017

TAPP

ANDROID DEVELOPER

Worked as an android developer for a social network application. I was in charge of UX, back-end and server development.

2015 - 2016

CSGO-RAFFLE

BACKEND DEVELOPER

Backend developer for an online casino dealing with virtual currency. I was lead developer and manager of the system that dealt with bets, security and probability.

2013 - 2015

FREELANCING

BACKEND DEVELOPER

Worked freelancing for many small companies providing solutions and help where I was needed.

2011 - 2013

TGC

BACKEND DEVELOPER

Worked on backend launcher solution and web app for an indie game which would handle updates, repairs, accounts and communication inbetween the platforms.

2010 - 2011

O-DESIGN

WEB DEVELOPER

Worked as a front and backend web developer for a start-up. My task was to innovate and create good looking and user friendly websites ranging from one pagers to web shops.

I also developed and currently maintaining the [Green Party](https://klimate-smart-kristinehamn.se/) website for my home town
